“Are we still talking
about a bike lane
here?”

Motivating questions

Motivating questions

- How does something as simple as *bike lanes* gather so many associations?

Motivating questions

- How does something as simple as *bike lanes* gather so many associations?
- Do people with different perspectives on bike lanes argue for/challenge certain associations?

Indexicality

Indexicality

- Ability of language to evoke contexts in which it occurs

Indexicality

- Ability of language to evoke contexts in which it occurs
- Mapping from linguistic features to (social) context

Indexicality

- Ability of language to evoke contexts in which it occurs
- Mapping from linguistic features to (social) context

Indexical orders

Indexical orders

- Levels of indexical meanings

Indexical orders

- Levels of indexical meanings
- New *indexical orders* build on, compete with existing orders (often ideological)

Indexical orders

- Levels of indexical meanings
- New *indexical orders* build on, compete with existing orders (often ideological)
- Examples:
 - /ai/ Southern accent
 - T/V distinction

Indexical orders applied

Indexical order **Overview**

Pro-bike lane use

Anti-bike lane use

Indexical orders applied

Indexical order	Overview	Pro-bike lane use	Anti-bike lane use
1st	Physical space	Areas on roads for bicycle traffic	Areas on roads taken away from car traffic, parking

Indexical orders applied

Indexical order	Overview	Pro-bike lane use	Anti-bike lane use
1st	Physical space	Areas on roads for bicycle traffic	Areas on roads taken away from car traffic, parking
2nd	Functions, effects	Comfort and safety for people traveling by bicycle	Inconvenient for drivers, disrupt traffic flow

Indexical orders applied

Indexical order	Overview	Pro-bike lane use	Anti-bike lane use
1st	Physical space	Areas on roads for bicycle traffic	Areas on roads taken away from car traffic, parking
2nd	Functions, effects	Comfort and safety for people traveling by bicycle	Inconvenient for drivers, disrupt traffic flow
3rd	Social identities: characteristics of bike lane users	Young, progressive commuters, but can include recreational riders and families with children	Few young, progressive, white newcomers, not the majority of Pittsburghers, not traditional Pittsburghers

Indexical orders applied

Indexical order	Overview	Pro-bike lane use	Anti-bike lane use
1st	Physical space	Areas on roads for bicycle traffic	Areas on roads taken away from car traffic, parking
2nd	Functions, effects	Comfort and safety for people traveling by bicycle	Inconvenient for drivers, disrupt traffic flow
3rd	Social identities: characteristics of bike lane users	Young, progressive commuters, but can include recreational riders and families with children	Few young, progressive, white newcomers, not the majority of Pittsburghers, not traditional Pittsburghers
4th	Characteristics of a city that includes bike lane users	Tech companies; progressive; modern.	Ignores long-time residents and their interests

Indexical orders applied

Indexical order	Overview	Example
1st	Physical space	"The city's second protected bike lane is nearing completion. Parallel parking separates the bike lanes from traffic adjacent to Phipps Conservatory. Parking in the bike lane is not legal ..."
2nd	Functions, effects	"The fact of the matter is that bike lanes save lives. They help keep Pittsburghers healthy."
3rd	Social identities: characteristics of bike lane users	"While I like bike lanes, not many of us use them" (Welch)
4th	Characteristics of a city that includes bike lane users	"tech companies ... ask for safe streets and to be able to ride a bike to work. Twenty-first century cities are being designed so that people don't have to own a car to be able to live and work in a city" (Peduto)

Methods

Concordance analysis

Concordance analysis

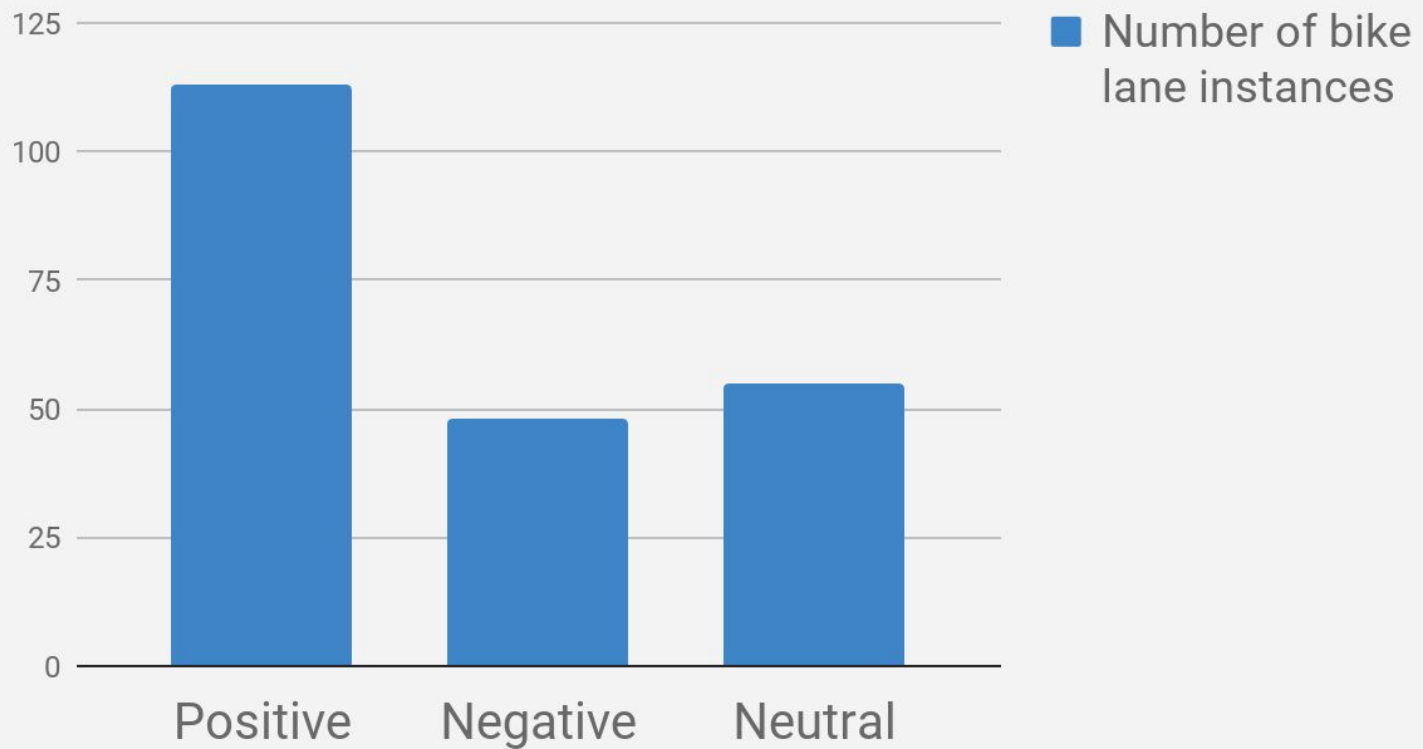

- Looked at sentences surrounding each instance of *bike lanes*

Concordance analysis

- Looked at sentences surrounding each instance of *bike lanes*
- Annotated for: **sentiment, indexical order, event**

Concordance analysis

Sentiment across bike lane instances

Concordance analysis

Indexical orders across bike lane instances

Findings

Event vs sentiment

Event vs sentiment

Event vs sentiment

- Most positive: crash (bike lanes could save lives)

Event vs sentiment

- Most positive: crash (bike lanes could save lives)
- Most negative: mayoral race (bike lanes are unpopular)

Event vs indexical order

Event vs indexical order

Event vs indexical order

- 1st order: installation of bike lanes

Event vs indexical order

- 1st order: installation of bike lanes
- 2nd order: crash

Event vs indexical order

- 1st order: installation of bike lanes
- 2nd order: crash
- 3rd order: installation of bike lanes (culture change?)

Event vs indexical order

- 1st order: installation of bike lanes
- 2nd order: crash
- 3rd order: installation of bike lanes (culture change?)
- 4th order: mayoral race

Sentiment vs indexical order

Sentiment vs indexical order

Sentiment vs indexical order

- Positive instances stressing 2nd order (safety)

Sentiment vs indexical order

- Positive instances stressing 2nd order (safety)
- Negative instances operating on 1st order (use of space)

Conclusion

Questions, revisited

Questions, revisited

- How does something as simple as *bike lanes* gather so many associations?

Questions, revisited

- How does something as simple as *bike lanes* gather so many associations?
 - > *Use in different discursive contexts, different orders of indexicality*

Questions, revisited

- How does something as simple as *bike lanes* gather so many associations?
 - > *Use in different discursive contexts, different orders of indexicality*
- Do people with different perspectives on bike lanes argue for/challenge certain associations?

Questions, revisited

- How does something as simple as *bike lanes* gather so many associations?
 - > *Use in different discursive contexts, different orders of indexicality*
- Do people with different perspectives on bike lanes argue for/challenge certain associations?
 - > *Text from different groups reinforce bike lanes in indexical orders conducive to their argument*

Thank you!
